#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitations "the predetermined behavioral model" and "the user's operation" in lines 2-3, and 6. There are insufficient antecedent basis for these limitations in the claim. Claims 2, 5, 6, 9, 10 are indefinite for the same reason as set forth in claim 1.

Claim 3 recites the limitations "the predetermined growth model" and "the user's operation" in lines 2-3, and 6. There are insufficient antecedent basis for these limitations in the claim. Claims 4, 7, 8, 11, and 12 are indefinite for the same reason as set forth in claim 3.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 5, 6, 9, 10, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Sharpe, III et al U.S. Patent 6,012,961.

Sharpe, III et al disclosed an editing apparatus having a reprogrammable digital memory for controlling a predetermined behavioral model of a robot device (34).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 7, 8, 11, and 12, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sharpe, III et al U.S. Patent 6,012,961.

It is noted that Sharpe, III et al failed to specifically teach the display means for visibly displaying growth model and editing the growth model. However, the robot device (34) of Sharpe, III et al is reprogrammable and capable of displaying any particular programmed model. Accordingly, it would have been a matter of design choice to program the robot of Sharpe, III et al to perform any particular model.
